

XoticFelt®

Bamboo-Rayon

Style: BAM001

Care Instructions

Cleaning Your XoticFelt® - Style BAM001

XoticFelt® will maintain its "Xciting" colors and soft texture if care is taken during cleaning.

Ideal Cleaning Method – Dry Clean

Dry cleaning XoticFelt® is strongly recommended

Important Note: Some shrinkage will still occur during dry cleaning (2% in the machine direction and 1% in the cross-machine direction).

What is bamboo-rayon?

Although the bamboo fibers in XoticFelt® originate from a natural raw material, the bamboo fibers are actually considered cellulose or specialty rayon due to the manufacturing process used to turn the bamboo grass or stalks into pulp and then into fiber. Standard rayon fibers originate from wood pulp, which is also a natural raw material. XoticFelt®, made from a blend of specialty-rayon (from bamboo) and rayon, is noticeably softer than other felt products. It also uniquely absorbs dyes for luxuriously rich and vibrant colors.

Alternative Cleaning Method – Washing

Although dry cleaning is the preferred and recommended method for cleaning, National Nonwovens recognizes that some consumers will still wash XoticFelt®. To keep quality loss at a minimum, please follow these instructions:

1. Wash colors separately
2. Use Delicate Cycle
3. Use Cold Water/Cold Rinse
4. Dry Flat or on Delicate Cycle

Important Note: XoticFelt® will shrink approximately 10% in the machine direction and 3% in the cross-machine direction. To minimize shrinkage, lay flat to dry (block as you would a sweater).

Bamboo

About the Plant & Fiber:

- Naturally soft, light, and strong
- Fastest growing timber plant on earth
- Antibacterial & antifungal (Bamboo Kun)
- Thrives naturally without pesticides
- Easily blends with other natural fibers, such as rayon
- A renewable, sustainable textile
