

The Other Felt Products

WoolFelt® is National Nonwovens most popular product, but what about the lesser known products in National Nonwovens' Craft & Novelty Division? Here are several **other** styles in our felt family:

- FiestaFelt® Style ACF001: 100% acrylic felt.** FiestaFelt® has superior quality compared to other competitive synthetic felt products. We also have a large assortment of brilliant colors. Benefits of acrylic felt compared to wool and wool-blend felts are cost and its ability to be machine washed without shrinkage.
- XoticFelt® Style BAM001: bamboo-blend felt.** XoticFelt®, our newest felt product line, is crafted from an innovative blend of bamboo-rayon making it uniquely soft and strong. The bamboo-rayon fiber also enables us to offer exceptionally intense colors because of the inherent characteristics of the all-natural fibers to absorb dyes.
- ShenilleAppeal® Style CHN003: wool-blend felt with cotton scrim.** This colorfast scrim felt for chenilling provides extra body so felt can be embroidered without additional backing. ShenilleAppeal® is ideal for athletic lettering and award applications.

New Pattern Partner

SUCH Designs, Carrie Bloomston

Carrie started sewing five years ago when she was pregnant with her second child in a hormone-fueled mad dash to the sewing store! As a lifelong artist and graduate of the prestigious *Rhode Island School of Design*, art and design are second nature to Carrie. So as she started sewing, people asked her to write patterns and design fabrics!

Carrie is featured in many publications and has just completed her first book, *The Little Spark—30 Ways to Ignite Your Creativity*, with Stash Books (available Nov. 2014). She often uses WoolFelt® in her projects because of the great colors and variety of textures/blends. She intends to help you reconnect with your inner-artist and celebrate your creative spark.
