

Falling in Love with Fall Quilt Market

National Nonwovens always has a booth each year at Spring Quilt Market. Now, because we had so much fun exhibiting in Houston last year at Fall Quilt Market, we are going back to do it again. There is something about being in Houston that feels like homecoming. Perhaps it is the combination of friends, fabric, customers, and the wonderful Houston hospitality.

For those not familiar with the *International Quilt Markets*, they are the world's only wholesale trade shows for the \$1.6 billion quilting industry. Quilt Market offers business seminars, take & teach classes, and more than 500 exhibitors. In National Nonwovens' booth, not only will you enjoy seeing our fabulous felt, you will also discover felt projects from some of the industry's top designers.

The eve before Market opens a wonderful event takes place, *Sample Spree!* Select exhibitors, including National Nonwovens, offer products for sale on a cash and carry basis (see our specials below). It gets a little frantic and always sets the pace for an exciting and eventful Market.

Fall Quilt Market is a credentialed trade show, and not open to the general public (go to www.quilts.com to view requirements). However, after Market is over, the George R. Brown Convention Center is transformed into the *International Quilt Festival*. Quilt Festival is open to the public and is the largest annual quilt show in the U.S. with more than 1,000 booths. Is it any wonder why fabric lovers fall in love with Houston each year during Autumn!
